

Your Social Security retirement or disability benefits may be reduced

If you work for an employer who does not withhold Social Security taxes from your salary, such as a government agency or an employer in another country, the pension you get based on that work may reduce your Social Security benefits.

The Windfall Elimination Provision affects how the amount of your retirement or disability benefit is calculated if you receive a pension from work where Social Security taxes were not taken out of your pay. A modified formula is used to calculate your benefit amount, resulting in a lower Social Security benefit than you otherwise would receive.

When your benefits may be affected

The Windfall Elimination Provision primarily affects you if you earned a pension in any job where you did not pay Social Security taxes and you also worked in other jobs long enough to qualify for a Social Security retirement or disability benefit.

For example, this provision affects Social Security benefits when any part of a person's federal service after 1956 is covered under the Civil Service Retirement System (CSRS). However, federal service where Social Security taxes are withheld (Federal Employees' Retirement System or CSRS Offset) will not reduce your Social Security benefit amounts.

The Windfall Elimination Provision may apply if:

- You reached 62 after 1985; or
- You became disabled after 1985; and
- You first became eligible for a monthly pension based on work where you did not pay Social Security taxes after 1985, even if you are still working.

Why a different formula is used

Social Security benefits are intended to replace only a percentage of a worker's pre-retirement earnings. The way Social Security benefit amounts are figured, lower-paid workers get a higher return than highly paid workers. For example, lower-paid workers could get a Social Security benefit that equals about 55 percent of their pre-retirement earnings. The average replacement rate for highly paid workers is about 25 percent.

Before 1983, people who worked mainly in a job not covered by Social Security had their Social Security benefits calculated as if they were long-term, low-wage workers. They had the advantage of receiving a Social Security benefit representing a higher percentage of their earnings, plus a pension from a job where they did not pay Social Security taxes. Congress passed the Windfall Elimination Provision to remove that advantage.

How it works

Social Security benefits are based on the worker's average monthly earnings adjusted for inflation. We separate your average earnings into three amounts and multiply the amounts using three factors. For example, for a worker who turns 62 in 2009, the first \$744 of average monthly earnings is multiplied by 90 percent; the next \$3,739 by 32 percent; and the remainder by 15 percent. The sum of the three amounts equals the total monthly payment amount.

The 90 percent factor is reduced in the modified formula and phased in for workers who reached age 62 or became disabled between 1986 and 1989. For those who reach 62 or became disabled in 1990 or later, the 90 percent factor is reduced to 40 percent.

There are exceptions to this rule. For example, the 90 percent factor is not reduced if you have 30 or more years of
